

Availability of Information in the Field of Agricultural Sciences From the Matica Srpska Library, Serbia

M.Sc. Marina Đaćić – Senior Information Librarian
mdjacic@bms.ns.ac.rs

The Matica Srpska Library is the oldest Serbian national library and the first public and scientific library of Serbs. It was founded in 1826, in Pest, together with the foundation of the Matica Srpska Literary Society

The Matica Srpska Library today

- The Matica Srpska Library in its funds has more than 4,000,000 books and other publications.
- The Library receives the sample copy of all the publications of Serbia.
- The Library has 707 old manuscript books.
- The Library exchanges publications with 320 foreign libraries and institutions.
- Cataloguing and bibliography work are automated since 1989.
- The Library gives services in research domestic as well as foreign data bases.
- In its 7 reading-rooms there are 250 seats.

At the Matica Srpska Library (MSL), access to scientific information in the field of agriculture is provided in several ways:

- Library's e-catalogue
- KOBSON - Consortium of Libraries for Coordinated Acquisition
- AGRIS database
- Institutional and thematic repositories
- COBISS system – the union catalog of Serbian libraries
- Interlibrary loan

Početak / KoBSON / Statistike

Statistike

Iskorišćenost servisa

Racionalizacija nabavke, kao osnovni cilj KoBSON-a, ne bi bila ostvarljiva bez optimizacije nabavke zasnovane na odgovarajućim podacima i tehnikama. U saradnji sa izdavačima pretplaćenih elektronskih servisa KoBSON sprovodi redovnu aktivnost praćenja iskorišćenosti pretplaćenih izvora. Ovi podaci javno su dostupni. Neki od pokazatelja prate se na nivou Republike u celini, dok se drugi prikupljaju na nivou pojedinih istraživačkih ustanova.

Obilje pretplaćenih izvora predstavlja više od slučajno prikupljenih zbirki podataka, i potrebno je učiniti dodatni napor da se i omogući njihovo efikasno korišćenje. To, pre svega znači aktivnosti na unapređivanju komfora korisnika, vodeći računa o brzini i stalnosti pristupa pretplaćenim izvorima. Cilj evaluacije je optimizacija nabavke koja se ostvaruje objedinjavanjem informacija o potrebama korisnika, cenama servisa, uslovima plaćanja i iskorišćenosti pretplaćenih izvora.

KoBSON trenutno obezbeđuje korisnicima preko 35.000 stranih naučnih časopisa u elektronskoj ili papirnoj formi, a taj broj nastojimo i dalje da povećavamo. Kolekcija časopisa koja se nudi korisnicima u Srbiji se u visokom procentu pre pokriva sa listom časopisa Web of Science, a koji obuhvata objektivno najznačajnije svetske časopise. Taj izvor se u mnogim svetskim bibliotekama koristi za vrednovanje kolekcije.

BRZA STRANICA

KOBSON or the Consortium of Libraries for Coordinated Acquisition was founded in 2001 upon the initiative of several of the largest libraries in Serbia, including MSL.

KOBSON allows access to articles in various fields of science, including agriculture. Currently, it offers access to approximately 230 different journals in the area of agricultural science.

KOBSON is searched via websites hosting the journals: Science Direct, EBSCO, DOAJ, WILEY online library and others. Access to full texts depends on the policy of the publisher, that is, aggregator.

In Serbia there are also institutional and thematic repositories which may also be an interesting source of domestic scientific information in the field of agriculture.

In the 2018. year, our Ministry of Education, Science and Technological Development adopted a Platform on open access to scientific information, by which universities and science institutes are obligated to make the papers written by their employees visible to the public (naturally, in accordance with copyright guidelines and publishers' licenses).

Данас, податке уноси 215 српских библиотека:
2.010.333 књига, 1.053.488 чланака, 76.938 часописа, 17.441 CD-ова/DVD-ова ...

Списак свих библиотека Остале базе података

Using the mutual catalogue of the Serbian libraries via the COBISS system, one can simultaneously search an e-catalogue of 215 libraries in Serbia.

The libraries cooperate with each other and, by way of interlibrary loans, literature finds its way to the reader.

MSL has developed a good interlibrary loan system with libraries abroad. We most often cooperate with libraries in Germany, Austria, Switzerland and so on, through the SUBITO service.
