tissue was collected in the negative pressure biosafety secondary laboratory, direct immunofluorescence assay (DFA) was used. After the positive brain tissue was fixed with 80% cold acetone, the fluorescein isothiocyanate isomer (FITC)-labeled anti-rabies virus nucleoprotein antibody was used to detect the virus, and the rabies virus was confirmed positive. The brain tissue samples of diseased dogs were ground with Dulbecco's modified eagle medium (DMEM) (GBICO, 2186828) medium containing 1% penicillin G/streptomycin G/ amphotericin B mixed solution (SOLAR BIO, P7630) to prepare 30% brain tissue suspension, which was centrifuged at 8000× g for 10 min to retain the supernatant, and the supernatant was frozen at -80 °C for standby.

1.2 Primer design

With reference to the whole genome sequences of two rabies virus strains (FJ712193 and FJ712195) from Zhejiang Province in recent years, primers for amplifying the whole genome nucleotide sequence of the rabies virus were designed (Table 1).

1.3 Whole genome sequencing and comparative analysis

The QIAamp Viral RNA Mini Kit (QIAGEN, Cat. No. 52904) was used to extract viral RNA from brain tissue suspension according to the instructions of the kit. The Prime-Script™ One Step RT-PCR Kit, Ver.2 (Dye Plus) (TaKaRa, Cat. No. # RR057A) was used for one-step RT-PCR amplification. In the reaction system of 25 μL, 2.5 μL viral RNA was added as the template, and the reaction procedure was: Reverse transcription process at 50 °C for 30 minutes, after 5 min of 95 °C pre-denaturation, the amplification procedure was carried out at 95 °C for 30 seconds, (50–52) °C for 30 s, and 72 °C for 60 s, with 35 cycles. The 1% agarose gel electrophoresis was used to confirm the amplification of target bands, and the sequence of fragment meeting the expected length was determined in both directions. The DeNovo As-

CNKI Journal Translation Project

- проект стартовал в 2015 г.
- спонсируется CNKI
- реализуется в сотрудничестве с Государственным управлением по печати, радио, кино и телевидению КНР
- Библиотека проекта по развитию реформ прессы и публикаций КНР

CNKI Journal Translation Project

- выбор и перевод статей из ведущих китайских академических журналов
- помощь ученым со всего мира в понимании и корректном применении результатов исследований китайских ученых
- журналы с высоким качеством академических исследований и продолжительной историей публикаций

Главная / Ресурсы / Ресурсы тестового доступа

China National Knowledge Infrastructure (CNKI). Коллекция полнотекстовых баз данных

Ссылка на ресурс:

<https://oversea.cnki.net/index/>

Описание:

China National Knowledge Infrastructure (CNKI) – электронная платформа информационных ресурсов, разработанная компанией Tongfang Knowledge Network Technology, основателем которой является Tsinghua University.

CNKI один из ведущих онлайн-ресурсов КНР на котором размещаются электронные версии газет, журналов, докторские и магистерские диссертации, материалы конференций, ежегодники, энциклопедии и справочники, патенты, стандарты и нормативные акты.

Ресурсы компании востребованы ведущими университетами, научно-исследовательскими институтами, правительственными аналитическими центрами и публичными библиотеками, среди которых более 30 000 организаций в самом Китае и 1 600 организаций в 60 странах мира.

В рамках тестового доступа предлагаются следующие базы данных:

1. *China Academic Journals Full-text database*

Полнотекстовая база данных китайских и зарубежных академических периодических изданий, в состав которой входит 8 490 китайских журналов, в том числе 1 970 журналов Пекинского университета, 2 900 журналов Online First, обеспечивающие возможность доступа к статьям на платформе CNKI до их официальной публикации в традиционном формате, содержащие в общей сложности более 62 млн. полнотекстовых статей.

Основные тематические области включают естественные науки, технические науки и технологии, сельское хозяйство, здравоохранение, философию и общественные науки.

Recommendation

China Theses and Dissertations Database

- Коллекция полнотекстовых, защищённых в Китае докторских и магистерских диссертаций
- Более 579 000 докторских диссертаций, защищённых (начиная с 1984 года) в 508 организациях
- Около 5 млн. магистерских диссертаций, защищённых в 787 образовательных учреждениях
- Охватывает все предметные области: общественные и гуманитарные науки, естественные науки, технические науки и технологии, **сельское хозяйство**, здравоохранение

Контроль за наполнением CDMD:
Министерство образования КНР

Academic Monographic Serials Database

- Более 1220 академических сериальных изданий (монографий), опубликованных в Китае с 1979 года на китайском языке.
- Более 368 000 статей
- Представлены публикации авторитетных колледжей, университетов и научно-исследовательских институтов
- Гуманитарные и социальные науки, инженерные технологии, медицина
